	- Number of visit per year : 860.000	

Golden Bridge - a wonderful architecture, its 'residence' is located in the Thien Thai garden at Ba Na Hills Resort, which opened in June 2018. The famous Ba Na spikes are now visible. more famous thanks to this interesting bridge.

History of Vàng Bridge

Some information about the Golden Bridge on Ba Na hill, Da Nang city: Length: 148.6 m (490 feet), with 8 spans, Width: 3m, Height: 1,414m above sea level, Lovely face Bridge: made of wooden slats, 5cm thick, gilded balustrade.

Its allure is its unique architecture. A pair of gray hands complete the style, cradled in the palm the yellow bridge is as soft as silk and stands out among the green forest. This contrasting image creates an old, nostalgic atmosphere. From a distance, the Golden Bridge looks like the hands of a mountain god supporting people in Thien Thai garden. Many people think that the hands lifting the bridge look like stone carvings, but that is not the case. The designers created it by framing the arm with wire mesh, clearing it with concrete, then finishing it with a matte glass exterior and decorating it. Construction of the entire bridge took about a year.

The work was designed by the Center for Landscape Architecture Design (TA Landscape Architecture), under the Ho Chi Minh City University of Architecture.

With a length of nearly 150 meters and an impressive design, the Golden Bridge at Ba Na Hills is likened to a silk strip floating in the clouds. The Golden Bridge leaning against Ba Na mountain and supported by a pair of hands to emerge from the hillside is really an extremely unique 1-0-2 design. Therefore, the Golden Bridge is also known as the Ban Tay Bridge in Da Nang. Compared with the volunteer image of the hands is a brilliant golden 'silk strip' nearly 150m long, including 8 spans, the longest span: 21,2m.

The bridge pier foundation structure is made of reinforced concrete, the bridge pier and spider legs are made of steel pipes. Bridge span structure with steel I-beam system linked together in the form of a solid frame. In addition, the case is covered with gold emulsion paint panels combined with shiny gold titanium-plated stainless steel balustrades to create a bright effect in the sunlight. The bridge deck is paved with natural birch wood. This is a selected wood that is very durable in the air, not subject to termites. With such design and materials, the project ensures sustainability against all harsh weather conditions in Ba Na. Also, The design of the bridge is difficult, Design is a process. The design team had to work with reality in many places, there were adjustments to the distance that made the geology unsuitable or complicated terrain difficult to construct, as well as the retention of the entire tree system. below the chasm, minimizing impact. However, with the continuous efforts and coordination between design, construction, and coordination, the Golden Bridge has been realized according to the original core idea, even with objective ways to make the solution reason to help open up a more impressive view of the surrounding natural landscape. Every detail is continuously considered in the design.

Experience Sightseeing, Taking Photos at the Vàng Bridge

Experience of Tanking Photo at Vàng Birdge :Ba Na Hills has always been considered the way to heaven, so the weather here is always beautiful. In particular, early morning or sunset are the two brightest times of the Golden Bridge. You can turn off liking to take very beautiful pictures and very shimmering backgrounds. In the early morning, patches of fog like a white silk band wrap around the golden bridge, creating a very fanciful space. When the sun comes out, warm rays of sunlight fill everywhere, creating a poetic feeling like a fairyland.

Experience Sightseeing :In addition to the Golden Bridge, this place also has many attractive entertainment destinations to welcome visitors. Normally, you should travel to Da Nang in the summer

or spring, from February to August of the solar calendar. At this time, the weather is relatively pleasant and very convenient for traveling and sightseeing.
