One of the longest and most distinctive bridges in the world as part of the Beijing-Shanghai High-Speed Rail joint venture, construction was completed in 2010.

## Contruction of Cangde Grand Bridge

The bridge has only about 3,100 piers and already acts like a globe.

The length of Cangde Grand Bridge super-large bridge is 105.81 km (65.75 mi) and it has a total of 3092 piers

Cangde competes with Tianjin for third place in most records, with little maintenance and extensive development that the two bridges continue to grow.
