

Jingyue Yangtze River Bridge

LONGEST

Brief	Information	Guiding
<p>The last one of the list is 869 ft high, and technically this is a cable-stayed bridge. Running between Yueyang and Jianli County. It is located above Yangtze River and opened for public in 2010. It is also known as Jingyue Dàqiáo.</p> <p>See more: https://en.wikipedia.org/wiki/Jingyue_Yangtze_River_Bridge</p>	<ul style="list-style-type: none"> - Country : CHINA - Height : 266m - Length : 5.419m - Year Built : 2010 - Number of visit per year : 444.467 	<p>Nearest Airport:</p> <ul style="list-style-type: none"> - Yueyang Sanhe Airport - N/A <p>Nearest Bus station:</p> <ul style="list-style-type: none"> - 监利白螺客运站 Bus Station - Bridge Shikeyun Station

The Yangtze River Bridge Jingyue (simplified Chinese: 荆岳大桥; traditional Chinese: 荊岳大橋; pinyin: Jīngyuè Dàqiáo) is a rope bridge spanning the Yangtze River between Jianli County, Hubei Province and Yue Yang, Hunan Province in central China.

History of Jingyue Yangtze River Bridge

The bridge was inaugurated in June 2010. There are 6 high speed lanes Suizhou—Yueyang.

The design is a cable-stayed bridge. The total length is 5,419 meters (17,779 ft). Height 265 meters (869 ft). The longest distance is 816 meters (2,677 ft)

Bridges and tunnels over the Yangtze River carry rail and road traffic across China's longest and largest river and form an important part of the country's transportation infrastructure. The river bisects China from west to east, all highways and north-south railways must cross the Yangtze River. Major urban centers along the river such as Chongqing, Wuhan, and Nanjing also have mass transit urban railways that cross the Yangtze.
